

WINE LIST

About our organic wines

Our organic wine offering is one of the most complete and substantive available, anywhere. You'll find the very best within these pages, some so judiciously allocated, rare and difficult to obtain, that we feel more than pleased to have them available for your pleasure and well being.

We constantly seek those growers and vintners who have turned their back on the use of harmful chemicals that are not only damaging to our health, but also contribute to weakened vines, diluted yields and lesser nutrients.

These growers take a little more time to work with Nature's abundance, with love and caring, produce wines of great taste and integrity to soothe and gladden the heart.

All the wines contained herein are sustainably farmed at the very least. While some vineyards may not be designated organic, they make a habit of not spraying chemicals unless circumstances demand. You can find designated organic and biodynamic wines with the help of your server or this legend:

PRACTICING ORGANIC BIODYNAMIC

Our corkage fee is \$25 per bottle, with a maximum of 2 bottles per table. We are unable to open any private cellar bottle that also appears on our list.

NOTE: Many of our natural handcrafted wines are often produced without fining or filtering. The sediment found in the bottle is a natural occurring and harmless byproduct which does not in any way alter the wine. We can not accept returns on wines for containing this natural sediment.

FRANCE
